

Step 2: Select a suitable skin

The appearance of your publication is determined by what we call the 'Skin'. A skin is a collection of all the graphical elements (like colors, fonts, and background images) that together make up the User Interface for your publications.

FlippingBook Publisher comes with 24 professionally designed skins by default. These skins give a coherent look to all the elements in your publication.

Steps to change the skin

- 1 Go to the **Properties** pane.
- 2 Click on the **Select Skin** button.
- 3 Choose a skin that goes well with your publication by clicking on the miniature preview.

The new skin will be automatically applied to your publication.
